| 7. mute | 14. organizer compartments |

CONNECTION AND PAIRING

- Take out keyboard organizer out from the packaging.
- Open the battery apartment cover on the back side of the keyboard
- Insert 2* AAA batteries making sure polarity is correct, then replace the cover.

Pairing

- Access your Bluetooth settings on your home computer, laptop or if connecting to tablet or iPad, place it in the personal computer restt™.
- Then proceed to find the Bluetooth connection settings on your tablet, computer, notebook, phone or iPad which is "your device"

- Press down “ESC” key and “Q” key on the keyboard at the same time and the red light on top right of keyboard will blink;
- You will find “Bluetooth keyboard” appears on your Bluetooth connection menu or settings on **your device** that you will be using keyboard with.
- Now double click the “Bluetooth keyboard”, on **your device** and it will provide a password on the screen of **your device**.
- You type this password directly into your mykeyo keyboard and press enter.
- **Your device** may require you to also hit enter or next.
- After the device driver is loaded (may take a few minutes), the keyboard should be connected successfully and ready to use with **your device**. Generally, this is a one-time Setup.
- If you have problems, for example: will not connect or the shortcut keys do not work, remove all keyboard drivers from your Bluetooth Device menu, re-boot **your device**, and then repeat the pairing sequence.

REMINDER

1. Please dispose of packaging materials of keyboard according to the local environmental protection requirements.
2. Be careful not to allow water or other liquid into the keyboard. If it occurs, immediately turn the keyboard upside down, remove the batteries and let the water or liquid outflow. Proceed to let it dry for several days. A fan blowing on it will expedite the process.
3. This Bluetooth keyboard can only work with any computer/notebook, tablet, or smart phone which has built in Bluetooth. In addition, Smart Phones must support external keyboards. If your equipment does not have built in Bluetooth, you will need a USB Bluetooth adapter in an appropriate USB port. These adapters are available at your retailer or online with your retailer. Follow those instructions first for installing that adapter before attempting keyboard installation. Once installed follow these instructions.

Cleaning

- To properly clean the keyboard, remove the batteries, turn upside down with keys facing the floor and use a damp cloth and a mild detergent. (no dripping water, squeeze cloth to remove water drips)
- Then gently wipe the keys with the keyboard still upside down so no water can fall into the keyboard.
- Before turning back over and while still upside down, use a dry towel and pat dry.
- If no water dripped when using the damp cloth, you can then put the batteries back in and use immediately.
- ***If water drips even slightly when you were cleaning you should let keyboard dry for 1-3 days upside down with a fan blowing on it before putting batteries back in.***

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
